Animação. Física. 3D. Som. Entrega.

01 Remotion → motor de vídeo React

https://github.com/remotion-dev/remotion

02 HyperFrames → renderizador HTML-para-vídeo

https://github.com/heygen-com/hyperframes

03 Anime.js → coreografia de linha do tempo

https://github.com/juliangarnier/anime

04 React Spring → animação de mola

https://github.com/pmndrs/react-spring

05 PixiJS → gráficos 2D com GPU

https://github.com/pixijs/pixijs

06 p5.js → visuais generativos

https://github.com/processing/p5.js

07 Paper.js → caminhos vetoriais

https://github.com/paperjs/paper.js

08 Matter.js → física 2D

https://github.com/liabru/matter-js

09 Three.js → cenas 3D
https://github.com/mrdoob/three.js

10 Rapier → colisões 3D
https://github.com/dimforge/rapier

11 OGL → shaders personalizados

https://github.com/oframe/ogl

12 tsParticles → efeitos de partículas

https://github.com/tsparticles/tsparticles

13 glTF Transform → otimização de assets 3D
https://github.com/donmccurdy/glTF-Transform

14 GL Transitions → transições de shader

https://github.com/gl-transitions/gl-transitions

15 OBS Studio → captura de tela
https://github.com/obsproject/obs-studio

16 Chatterbox → narrações em voz

https://github.com/resemble-ai/chatterbox

17 Tone.js → sintetizadores e efeitos sonoros
https://github.com/Tonejs/Tone.js

18 faster-whisper → transcrição de legendas
https://github.com/SYSTRAN/faster-whisper

19 OpenCut → edição de linha do tempo
https://github.com/OpenCut-app/OpenCut

20 FFmpeg → codificação e entrega
https://github.com/FFmpeg/FFmpeg
